

*Serving our clients with integrity and excellence since 1978!*

## Natural Resources

Natural resource consulting services have been a core capability offered by RCI since its establishment in 1978. RCI offers a unique combination of expertise in both technical and policy aspects of natural resource consulting. As a result, RCI has a wealth of experienced Natural Resource Specialists, Project Managers and Principals. At all levels, RCI staff understand the unique and nuanced resources and management challenges in Nevada and across the western US. We have the experience and key contacts to get the job done.

A capable and diverse staff makes RCI uniquely qualified to solve any natural resource challenge with the most effective solution regardless of location, ownership, or stakeholders. RCI offers technical expertise, in-depth awareness and understanding of critical policies and regulations, and in-house access to related disciplines to offer an integrated approach to any natural resource project.
